## ABOUT ME

As a Fullstack Java developer at PT Astra Honda Motor, I collaborate with software engineers, system analyst, and other teams on application requirements and design. I develop high-quality Java code, manage unit tests, and maintain robust source code. I also perform debugging, refactoring, enhancing, and testing of existing code. I have completed two certifications in programming, one from BNSP and few from Dicoding Indonesia. I also have experience in developing mobile applications using Flutter. I am a person who has good communication and problem-solving skills. I am motivated to learn new technologies and improve my coding skills.

## WORK EXPERIENCE

Junior Java Developer, PT Astra Honda motor, Jakarta

Jan 2023 - Jan 2024

- Developed high-quality Java code, managed unit tests, and maintained robust source code
- Collaborated with software engineers, product owners, and other teams on application requirements and design
- Performed debugging, refactoring, enhancing, and testing of existing code Designed and developed various features using the Java programming language

## EDUCATION

High School Diploma, SMK Karya Bahana Mandiri

2019

SMPN 26 Bekasi

2016

## INTERNSHIPS

Information Technology Intern, Jatis Mobile, Jakarta

Oct 2021 - Feb 2022

As an intern, my team and I have created a real application in the world of work within the company. Using Java Spring framework as backend and React for frontend. In this task we carry out testing, debugging and deploying programs that have been successfully built. Apart from that, we also demonstrated the application made to our leaders.

Student Internship, Pt. Sandipala Arthaputra, Bekasi

Apr 2018 - Jun 2018

As apprentices here we do things related to printing such as making cards and correspondence in any case. In this case we were also taught how to carry out the laminating process, print cards and make letters that will be distributed to related parties.
